

Don Joyce, Ph.D.

Deputy Director, Argonne National Laboratory

As deputy laboratory director, Don Joyce is responsible for programmatic and business activities in support of Argonne National Laboratory's director. Previously, as deputy to the director, Dr. Joyce oversaw Argonne's technology and business operations, the Strategic Planning Group and the Office of Technology Transfer.

Joyce has more than 20 years experience in technology development and general management. He came to Argonne from the position of chief technology officer for TechnologyConnect, a technology consulting firm in Massachusetts. In that position, he evolved the company business plan focusing on the business side of technology consulting, sales and licensing, and managed development of database technologies for "discovery" data mining and business-to-business exchange.

Before that, he was senior vice president of JDH Technologies LLC, which developed software for collaboration and e-learning; President of Muhlbauer Inc., equipment supplier to the semiconductor, circuit board assembly and smart card industries; chief of staff and scientific advisor to the director of Thomas Jefferson National Accelerator Facility, and an assistant research professor and post doctoral fellow in the Physics Department at the College of William and Mary in Virginia.

Joyce earned his Ph.D. in physics from the College of William and Mary and his B.S. in physics from the University of Colorado, and completed the Darden Executive Program at the University of Virginia.
